

ADM-1001
(Correspondence)

February 10, 1964

Dear Bob,

Our visit to your installation on January 23rd and 24th was one of the most profound experiences of my professional career. It was abundantly clear that you and your command are engaged daily in pushing back the frontiers of the impossible so as to make a major contribution to the national security of our country. It is also clear that you are doing so in a most efficient and workmanlike way which is a tribute to you and the management staff under your command.

We appreciated the kind hospitality you provided, especially the opportunity it afforded for us to meet in a non-professional way the real professionals who are part of your team.

Sincerely,

Albert D. Wheelon
